Objective

I have 3 years of experience as a ASP .net MVC and core and Python Full Stack Developer, specializing in Optical Character Recognition (OCR) and the Django framework. I am dedicated and results-driven, with proven expertise in developing robust APIs and full-stack web applications, as well as automating document processing workflows to extract and store data efficiently in databases. I am passionate about building scalable, efficient, and high-performance solutions, and I am seeking a challenging role where I can leverage my skills in Python, Django, and modern web technologies to create impactful software solutions.

Experience

- Analysis Infotech**09/2021 - 12/2021
Internship for College final year Project
 - Developed a "Room Rental Service Project" as a full-stack application.
 - Utilized Python with the Django framework and S Q Lite database for the backend.
 - Implemented the frontend using HTML, CSS, JavaScript, and Bootstrap.
- OIF TECH PVT LTD**09/2022 - Present
Software Developer (Full Stack Developer)
. ASP .net MVC and Core Full stack developer
Designed and implemented OCR reading solutions using Python to extract text from various uploaded documents, including
Mulkiya, Emirates ID, Policy Documents, DL, Aadhaar, PAN, and TL.
 - Successfully automated the workflow to extract text from PDFs and images, save the data to a database, and auto-populate it into text boxes, significantly streamlining document processing
 - Developed and maintained API services for OCR reading functionality using Python.

Education

Course / Degree	School / University	Grade / Score	Year
Master of Computer Application	Jain University Bengaluru	91.81%	2025
Post Graduation Diploma in Computer Application	Government Polytechnic Lucknow	80.13%	2022

Skills

- Asp .net mvc and core API Integration and Generation
- Python
- Frontend- HTML, CSS, JavaScript,jQuery, React Js, Bootstrap etc.
- SQL
- php
- Angular

Projects

- CAMS Bima Central (Call Center Agent Application)**
Role- .net developer
Developed a Call Center Agent application using ASP.NET MVC & .NET Core API
Used Entity Framework and LINQ to SQL for data access
Created REST APIs and implemented CRUD operations
Worked on insurance customer and policy management modules
- Floruit KYC Dubai Project**
 - Role: .net Full Stack Developer
 - Developed a KYC (Know Your Customer) web application from scratch for Floruit, Dubai, using the .net core.

Designed and implemented a secure and scalable platform to collect, verify, and manage customer identification documents efficiently. Integrated OCR (Optical Character Recognition) for automated data extraction from uploaded documents, reducing manual entry and improving accuracy.

- Insureatoasis CRM Dubai**

Role: .net Developer
Developed and enhanced a Customer Relationship Management (CRM) system for Insureatoasis, Dubai,using .net, LINQ, entity framework and leveraging Python OCR (Optical Character Recognition) functionality to automate document processing, allowing the system to extract and store client and policy information directly into the database. Designed user-friendly. Focused on improving workflow automation, data accuracy, and overall operational efficiency.

- Room Rental Service**

Role: Python Full Stack Developer
Technologies: Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite.

Developed a Room Rental Service web application using the Django framework, enabling users to list, search, and rent rooms seamlessly. Implemented both frontend and backend functionalities, ensuring a smooth and responsive user interface with HTML, CSS, JavaScript, and Bootstrap. Designed and integrated the backend logic in Python with an SQLite database for efficient data storage and retrieval. Focused on creating a user-friendly platform with secure authentication, data validation, and efficient CRUD operations for managing room listings.

- JK Inter College Meerut website Development as freelancer**

Role: Python Full Stack Developer
Technologies: Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite.

Developed the official website for JK Inter College, Meerut from scratch using the Python Django framework. Designed and implemented both the frontend and backend to provide an intuitive, responsive, and user-friendly interface. Integrated dynamic content management features, enabling administrators to easily update information such as notices, events, faculty details, and student resources. Utilized HTML, CSS, JavaScript, and Bootstrap for an engaging UI, and SQLite for reliable data storage and retrieval. Focused on delivering a secure, scalable, and performance-optimized web solution tailored to the institution's needs.

- API creation and Integration**

Developed a robust RESTful API using .net core

Achievements & Awards

- From my current company - Certificate in Demonstrating Remarkable Quick Learning Abilities.

Languages

- Hindi and English

Declaration

- I hereby solemnly declare that the information stated above is true and correct to the best of my knowledge and belief. I am enthusiastic about the opportunity to contribute my skills to your esteemed organization.
